QAMAR UL ISLAM

Backend & AI Systems Engineer | Go • Python • TypeScript

Islamabad, Pakistan • +92 314 8412001 • qamarislam1232@gmail.com • qamar2315.github.io • github.com/Qamar2315 • linkedin.com/in/qamar-ul-islam

PROFESSIONAL SUMMARY

Backend & AI Systems Engineer with extensive experience architecting high-throughput microservices, database-isolated multi-tenant SaaS platforms, and enterprise-scale RAG systems using Go, Python, and TypeScript. Founder & Lead AI Architect of Ask Sunnah (production RAG platform), Founding Backend Engineer at Nrtur, and AI Backend Engineer for Product Marketing Alliance (PMA). Adept at concurrent vector search, asynchronous worker queues, and telephony integrations.

WORK EXPERIENCE

Founding Backend Engineer | Nrtur — *Jun 2026 – Present | Islamabad, Pakistan*

- Core backend architect for Nrtur, an enterprise multi-tenant SaaS CRM built in Go, leading backend system architecture, API design, and core service implementations.
- Designed a secure database architecture in PostgreSQL with strict workspace isolation, guaranteeing complete tenant data privacy.
- Spearheaded the VoIP softphone and dialer integration using Twilio, implementing real-time call phase state management and automated call recording webhooks.
- Architected a provider-synced email inbox (Aurinko API) with OAuth connectivity, historical backfill, incremental delta sync, and secure token management.
- Implemented asynchronous queue processing with Redis for batch CSV imports, automated lead scoring, and notifications, paired with Server-Sent Events (SSE) for live event streaming.

Founder & Lead AI Architect | AskSunnah AI — *May 2025 – Present | Remote (asksunnah.online)*

- Founded and built Ask Sunnah (https://asksunnah.online), an AI platform providing multilingual Hadith exploration, semantic search, and authenticity verification through a custom RAG architecture.
- Engineered an asynchronous vector retrieval engine in Pinecone, querying multiple knowledge namespaces concurrently to deliver low-latency semantic search across large text collections.
- Designed a multi-stage AI workflow that detects user languages, embeds queries for context retrieval, and delivers verified answers translated into native scripts.
- Built an OCR verification engine powered by multimodal vision models to extract text from user-uploaded images and generate structured authenticity verdicts with confidence ratings.
- Developed an async FastAPI backend with Redis-backed rate limiting, email/OTP authentication, tiered subscription quotas, and MongoDB storage, paired with a Next.js 16 frontend.

Backend & AI Engineer | DevAxl — *Feb 2025 – Present | Islamabad, Pakistan*

- PMM-GPT (Product Marketing Alliance): Architected and deployed a multi-community serverless RAG knowledge engine for Product Marketing Alliance (PMA). Built automated Python ETL pipelines ingesting multi-source content into Pinecone, served via Firebase Cloud Functions with hybrid vector search.
- Financial Integration Platform: Engineered a NestJS and MySQL (TypeORM) backend integrating client accounting platforms (Xero) with automated OAuth token handling and custom reporting analytics.
- AI Lead Generation: Built automated data extraction and AI verification workflows on Linux VPS infrastructure, integrating verified leads into CRM platforms.

Freelance Backend & AI Developer | Fiverr — *Jul 2023 – Jul 2025 | Remote*

- Level 2 Seller on Fiverr (51+ completed orders, 4.8★ rating with 28 five-star reviews), building custom backend architectures, AI/RAG integrations, and automation systems for global clients.
- Built secure RESTful API architectures using Node.js (Express/NestJS) and Python (FastAPI/Flask), integrating payment gateways (Stripe, PayPal) and communication APIs (Twilio).

KEY PROJECTS

Nrtur — Multi-Tenant SaaS CRM Go Backend | Go 1.26, chi, PostgreSQL, Asynq/Redis, Twilio Voice, Stripe, Docker

Engineered the modular Go backend featuring database-enforced tenant isolation, Twilio VoIP softphone dialer, Aurinko email delta sync, and Asynq background workers.

Ask Sunnah — Production RAG Platform | FastAPI, Next.js 16, Pinecone, OpenAI, Redis, MongoDB

Solo-founded live production platform (asksunnah.online) with concurrent multi-namespace vector retrieval, OCR image validation, and multilingual query translation.

PMM-GPT — Serverless RAG Knowledge Engine | Python, Firebase Functions, Pinecone, OpenAI, Google Cloud

Architected multi-community RAG system for Product Marketing Alliance (PMA) with dense + BM25 hybrid search, LLM reranking, and live event-driven Firestore synchronization.

VoiceType AI — Voice-to-Text Desktop App | Rust, Tauri v2, React 18, cpal, OS Keychain

Built cross-platform dictation tool with in-memory audio downmixing, multi-provider cloud transcription + LLM refinement, and panic-safe RAII clipboard injection.

TECHNICAL SKILLS

Languages: Go (Golang), Python, TypeScript / JavaScript, SQL, Rust, HTML5/CSS3

Backend Architecture: chi, FastAPI, NestJS, Express.js, Microservices, Asynq/Redis, Twilio Voice, SSE, WebSockets

AI / ML & RAG: Pinecone (Hybrid Search), LangChain, OpenAI API / Gemini, RAG Pipelines, Pydantic, OpenCV

Databases: PostgreSQL (pgx/sqlc), MySQL, MongoDB, Firebase Firestore, Redis, TypeORM

DevOps & Cloud: Docker, Linux VPS, Git & GitHub Actions, Google Cloud / Firebase, Nginx, testcontainers

Frontend: React 19, Next.js, Tailwind CSS, Bootstrap 5

EDUCATION

Bachelor of Science in Software Engineering | **COMSATS University Islamabad, Pakistan** *— 2021 – 2025*
